

AC Drive System

Micromaster 4 is the fourth-generation offering in the Micromaster inverter line, a universal drive series for AC motors from 1/6 HP to 300 HP. Micromaster 4 offers a new, user-friendly parameter structure that simplifies installation and startup for basic to complex speed-control applications. Micromaster 4

shares common configuration and operating features across all models, which include micro inverter, basic, variable-torque rated, and vector-controlled performance models. All common worldwide voltage ranges are met with 200- to 240-volt, 380- to 480-volt, and 500- to 600-volt units.
